# Collaboration Tools for the Open Science Alliance
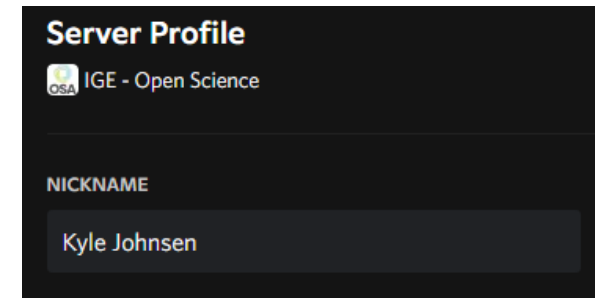

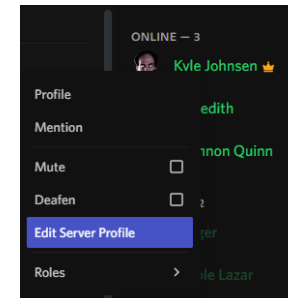

Discord

- Download at discord.com
- Browser interface is available, but **native apps are best**
  - **Especially the mobile app for notifications**
- Join our OSA server (link in chat)

Change your nickname after joining the OSA Server
- Right click your name, and Click "Edit Server Profile"
- You can have a different nickname in every server

Discord Tips

- Text channel – Post general messages to those in the channel
  - Excellent for sharing images/videos/links/files (limited to 50MB)
- Voice/Video/Text channel – Synchronous groups w/ video optional
  - Simultaneous Screensharing
- Direct Messages
  - Click "Home" in the top left
  - Can only invite "Friends"
 - Great alternative to creating new channels for a small group

- Tips
  - Mention others with @nickname
    - Causes notifications
  - Voice input/output settings are a little hard to find at first (click the carat)
  - Screensharing defaults to "application", which shares sound as well
    - Click "Screens tab" to share whole screen
  - Share formatted code in text with three backticks (```)

```html
<a href="openscialliance.github.io">Open Science Alliance</a>
```

GitHub

- github.com/openscialliance
- openscialliance.github.io

Create or share your GitHub account

- github.com

Please contribute

- Headshot
- Short profile description (feel free to embed links)
